

MOUNTAIN **PREVIEW** #2/2026

FALL/WINTER 2026-2027 PREVIEW

The best new products for those who love the mountains

Ready for the coming winter.

The third edition of Mountain Preview is dedicated to the best products coming in fall/winter 2026/2027. We present them here in preview, and then we will test them and publish our reviews on Mountainreview.com in the fall, when they will be available in specialty stores.

A tip for retailers: order them early because they are sure to be best sellers!

“Be snow, my friend!”

When thinking about winter clothing and equipment, we paraphrased Bruce Lee’s saying: *“Be like water. Adapt to the shape that contains you.”* A phrase that, in our opinion, hides a great truth for us mountain lovers too.

Winters have changed, and we must adapt. This includes rethinking the way many outdoor products are designed.

After all, it is no surprise that winters are not what they used to be: less precipitation, unpredictable temperatures, changing conditions. But what does all this mean for those who manufacture and sell mountain clothing and equipment? And, above all, for those who buy them?

We have an idea, as Mountainreview.com is a privileged observatory of the moods and preferences of mountain enthusiasts. The request we receive most frequently can be summed up in one word: versatility!

Are conditions becoming unpredictable? Is there powder one day and ice the next? Then you need products that are flexible, designed to be functional and versatile.

Not that the era of hyper-specialization is over, no. However, alongside the need for specialized “tools,” there is an increasingly strong demand from the ‘enthusiast’ public for a product that performs well even when you don’t know for sure what the conditions “out there” will be like.

A form of resignation to the whims of the weather? No, just healthy realism! This is what mountain enthusiasts ask of manufacturers. Less flights of fancy, more practicality. To live through increasingly complicated winters in the simplest and most passionate way possible.

With these “wishes” in mind, we talked to outdoor companies and went to Prowinter in Bolzano, where we got our hands on and selected a list of almost 50 products that we think are perfect for simplifying our lives in the fall/winter of next year.

Enjoy reading!

50 must-see new items for the fall/winter 2026-2027 season!

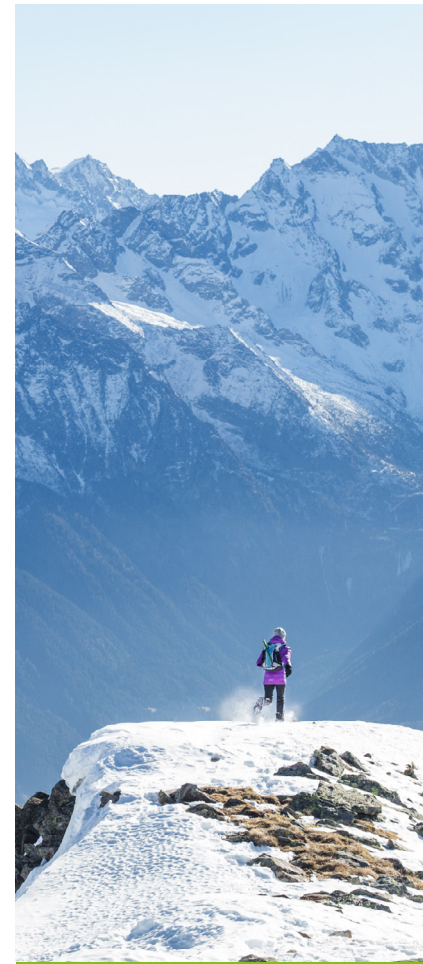

MOUNTAINEERING

ROCK CLIMBING

SKI TOURING

TRAIL RUNNING

TREKKING / HIKING

Mountaineering

Arc'teryx Beta AR

The most durable hardshell in the Beta line, designed for intensive use in alpine environments. Its GORE-TEX Pro ePE construction concentrates maximum abrasion and moisture resistance in the most exposed areas, while keeping the torso lighter to reduce weight and bulk. Updates include improved lamination, sturdier drawcords, and pockets optimized for use with a backpack. The RECCO reflector integrated into the hood supports search and rescue operations, while the new design reduces fabric waste during production.

Best for: anyone looking for an extremely reliable hardshell for mountaineering and technical mountain use, with no compromises on protection.

Retail price: ND

Black Diamond Mission Alpine Shell

The Mission Alpine system is built for technical alpine use, where protection, durability, and freedom of movement must coexist without compromise. Its 3-layer waterproof BD.dry™ construction is reinforced with Spectra® ripstop panels in high-abrasion zones to boost durability in the harshest conditions. Alpine-focused details include a helmet-compatible hood with RECCO®, articulated construction, and harness-friendly pocket placement, ensuring seamless performance on technical terrain.

Best for: Mountaineers and climbers tackling demanding terrain who want a reliable, performance-oriented system.

Retail price: 650,00 €

Blue Ice Phoenix

An ultralight technical ice axe designed for high-end snow and ice climbing. Phoenix delivers extreme performance and versatility through a stripped-down build with a hydroformed aluminum shaft and high-strength steel components. Its ergonomics echo an ice tool, offering precision on ice while staying light enough for alpine use. A modular design enables three configurations, shifting from a technical piolet to a more classic tool. Compatible with pick weights and an Alpine pick, it covers everything from traditional alpine lines to the most demanding routes.

Best for: Those who climb technical mountaineering routes on snow and ice and want a light, modular, high-performance tool.

Retail price: ND

Camp X-Lite

A light, highly versatile ice axe conceived as a bridge between waterfall tools and more traditional axes. Offered in a single 50 cm length, it's built for classic and technical mountaineering with a fast-and-light approach. The modular Avional head, derived from the X-Dream, allows different configurations to balance weight and function. A progressive-bend 7075-T6 aluminum shaft works both for effective piolet traction and for confident plunging on snow, while the milled grip and modular handle provide control and adaptability in every setup.

Best for: Classic and technical mountaineers who want one versatile tool for different styles and terrain.

Retail price: 170,00 €

Devold Reverso

A reversible technical line designed for an outdoor life without strict seasonal boundaries—where a garment adapts to the wearer, not the other way around. Reverso combines two functional surfaces in a single piece: one side in merino wool for thermal regulation, moisture management, and long-lasting comfort; the other more resistant and protective for exposed phases and intensive use. A practical design choice that removes the unnecessary and increases versatility, aligned with Devold's focus on durability, natural materials, and environmental responsibility.

Best for: Anyone who prefers merino over synthetics and wants uncommon, long-lasting, truly functional pieces.

Retail price: TBC

Ferrino Lightec -14 Down

A down sleeping bag designed to balance insulation, weight, and comfort during outings in the colder seasons. Lightec Down, with a comfort temperature of -14°C , it uses lightweight and durable 20D ripstop recycled polyester outer and inner fabrics, combined with 650 cuin (1,500 g) 90/10 down filling designed to provide reliable thermal protection on cold nights without excessive bulk. Offset stitching reduces heat loss, while the 3D shape in the foot area, thermal collar, and cold-weather visor improve comfort and efficiency. The Lightec Down line is also available in versions with different comfort temperatures to suit different conditions and seasons.

Best for: For those who practice mountaineering and multi-season trekking and need a lightweight, technical, and versatile down sleeping bag.

Retail price: 449,90 €

Mountain Equipment Xenith Hooded

A down jacket built to deliver maximum insulation at minimal weight, for when efficiency, warmth, and lightness are critical. Xenith uses hydrophobic goose down distributed in a honeycomb-style baffle construction, designed to maximize loft and thermal efficiency while limiting heat loss. The Helium 10D outer fabric blocks wind without sacrificing breathability, making it ideal for high-output days, cold starts, and alpine settings where every gram truly matters.

Best for: Fast-moving alpine and outdoor users who want an exceptionally warm, lightweight, efficient layer.

Retail price: 380,00 €

Rock Climbing

A woman is climbing a grey rock face. She is wearing a red jacket, black pants, and a colorful headband. She is looking up at the camera. A blue carabiner is visible on the rock face to her right. A rope is attached to her harness and extends downwards.

La Sportiva HyperEZ

Climbing shoes designed to make beginners' feet suffer less—both indoors and on rock. HyperEZ focuses on intuitive fit and immediate comfort, eliminating long break-in periods. A slightly roomier volume in high-pressure zones supports control and sensitivity without excessive constriction, helping climbers learn core movement skills. The padded collar improves comfort during longer sessions, while heel and midsole provide stability and progressive support. The synthetic upper helps avoid having to buy shoes overly tight.

Best for: New climbers who want a comfortable, intuitive, versatile shoe to progress from 4a to 6a without pain.

Retail price: 120,00 €

Ternua Vilma Pro Down Jkt

A hooded insulating jacket that evolves the well-loved Vilman model, keeping its warm, light, packable DNA. Recycled down provides effective insulation with reduced bulk, while the Pertex® Quantum® outer fabric blocks wind without compromising breathability. Recycled materials and an ergonomic cut deliver high comfort and a natural fit designed to move with you. A reliable, versatile thermal layer for cold-weather outdoor use.

Best for: Those looking for a warm, lightweight, packable insulating jacket for outdoor and mountain use.

Retail price: 279,95 €

Ski Touring

Arva Plum 30 UL

A ski mountaineering airbag backpack that redefines the balance between lightness, strength, and safety. With a total weight of around 1,400 grams, including the Reactor 2.0 system and carbon cartridge, the Plum 30 UL sets a benchmark for weight-to-volume ratio in its category. The structure in Aluula® Graflyte UHMWPE delivers exceptional durability within a clean, minimalist design, built for technical and intensive use. The Reactor 2.0 airbag system ensures reliability and optimal volume distribution, while the internal organization and carry systems meet the demands of modern ski mountaineering. Limited production and selective distribution underline its pioneering character.

Best for: Experienced ski mountaineers who prioritize efficiency, pace, and precision, without compromising on safety.

Retail price: 950,00 € (cartridge not included)

Black Diamond Helio 38

A pack designed for day ski touring and light overnight missions, where simplicity and efficiency matter. Its clean, minimal design is paired with practical organization, including a dedicated avalanche tool compartment, multiple access points to the main compartment, and a back panel engineered to shed snow. A well-balanced solution for long days out when you need to carry extra gear and alpine equipment.

Best for: Ski tourers looking for an essential, well-organized pack for full loads and light traverses.

Retail price: 240,00 €

Crazy Levity

A down jacket—updated in color for next season—built to minimize weight and bulk without sacrificing thermal performance. Bonded panel construction replaces traditional stitching, improving water resistance and freedom of movement. Ultra-light 7-denier bi-stretch nylon with DWR helps manage moisture, while 1000 cuin Diamond Down, hand-selected, delivers top-tier warmth-to-volume efficiency. The packable design and pockets reinforce its essential, highly technical character.

Best for: Those who want maximum thermal efficiency at minimum weight for fast alpine missions—without giving up a personal touch of style.

Retail price: 715,00 €

Deuter Freescape Tour

A ski-touring pack designed for multi-day traverses, available in 32 and 40 liters. It combines a technical layout with quick, intuitive access to gear for smooth movement on demanding terrain. The LiteSnow back system provides stability and comfort uphill and down, while features are optimized for skis and snowboards. Made entirely from recycled materials, it is Bluesign®, Grüner Knopf, and ClimatePartner certified, PFAS-free, and also available in an SL version tailored to women's anatomy.

Best for: Ambitious ski tourers tackling multi-day routes who want a technical, robust pack with a strong sustainability profile.

Retail price: 199,90 €

Elan Ripstick 94 BE

A high-performance all-mountain ski in its most structured and precise version. Ripstick 94 Black Edition keeps the line's signature nimble feel, adding stability and control for skiers who push hard in all snow conditions. Updated geometry—with a more forward radius and a more supportive tail—improves balance and turn flow. Lightweight construction includes size-specific carbon reinforcement, while QuadRod Reinforcement and C-Ply carbon laminate underfoot reduce vibration and sharpen precision at speed.

Best for: Expert skiers who want a stable, precise, performance-driven all-mountain ski for variable terrain and conditions.

Retail price: ND

Eska Arktis Lite

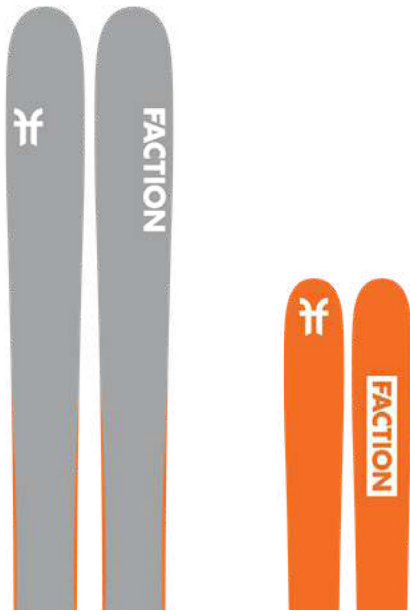

A 2-in-1 glove system designed to adapt to changing mountain needs. Arktis Lite evolves the Arktis GTX concept, focusing on greater sensitivity and control thanks to an independent inner glove without a waterproof insert. The outer mitten in softshell with Primaloft® Gold + Cross Core insulation delivers serious warmth, breathability, and comfort in static phases or harsh weather, while the removable inner glove remains light and precise for technical tasks. A modular system that lets you choose the right level of protection moment by moment, using recycled materials and a performance-first approach.

Best for: Ski mountaineering, freeride, and mountaineering users who need a modular glove—warm when necessary, precise when it matters.

Retail price: ND

Faction La Machine 2

A ski touring ski designed for long missions and multi-day traverses, where lightness and efficiency are central. La Machine 2 uses carbon reinforcement to minimize weight without giving up stability and control. Its heavily rockered profile is optimized for off-piste skiing, delivering a playful, intuitive ride across changing snow—from squeaky-dry morning conditions to heavier afternoon snow. A ski built for fluid movement, flotation, and freedom in how you interpret the terrain.

Best for: Experienced ski tourers who want an ultralight, fun ski for long tours and open terrain.

Retail price: 879,00 €

Ferrino High 23

A compact, functional ski-touring pack designed for day outings that don't require a lot of extra kit. High 23 focuses on efficient organization, with fast back-panel access that lets you reach contents without emptying the pack. A dedicated shovel/probe compartment keeps safety gear organized and quickly accessible. The HBS back system with ventilation channels, plus ergonomic shoulder straps and a padded hip belt, provides comfort and stability even on the descent. A full set of technical carry features rounds out the package.

Best for: Ski tourers who want a minimalist pack that still carries all the essentials without wasting space.

Retail price: 130,00 €

Fisher Quantum

 **Prowinter**
Award

A ski jacket re-engineered around a hybrid construction that differentiates protection and insulation based on the body's real needs. Quantum combines uninsulated 3-layer panels in lower-heat-loss zones with 2-layer sections integrated with ThinDown®, concentrating warmth where it matters most. This hybrid redesign reduces weight and bulk while improving freedom of movement without giving up protection. Despite weighing 21% less than the previous top-of-the-line model, it delivers the same thermal performance, with more precise thermoregulation during high effort.

Best for: Skiers who mix resort, freeride, and ski touring and want one versatile jacket that works everywhere.

Retail price: ND

Julbo Hailot LT

A dual-certified (ski and mountaineering) helmet designed for those seeking lightness, comfort, and versatility in alpine environments. Hailot LT is an even lighter take on the Hailot platform, maintaining strong ergonomics, effective ventilation, and a precise fit—ideal for long ascents and intense use, including racing. Built for modular use, it's compatible with headlamps, goggles, and eyewear thanks to the Eyewear Storage System. Summer/winter configurable padding extends usability across seasons, while its price point remains highly competitive.

Best for: ski mountaineers and mountaineers who want one do-it-all helmet adaptable to different activities and seasons.

Retail price: 169,00 €

Karpos Squall

A hardshell set built for ski mountaineering and technical mountaineering in harsh conditions, prioritizing full protection and reliability. Squall Jacket and Squall Pants share a 3-layer 170 g ripstop nylon construction, fully taped, with PFAS-free DWR and high waterproof/breathable performance. The cut is technical and functional for long days on the move, with dedicated vents, targeted reinforcements, and compatibility with helmet and suspenders. A complete shell system that's clean, robust, and ready for bad weather.

Best for: Ski mountaineers and technical mountaineers who need a durable, reliable set in any condition.

Retail price: 360 € jacket / 320 € pants

La Sportiva Granite 28 +

A technical, versatile pack for ski mountaineering, from dawn patrol to long freetouring days. Granite Tour 28+ offers expandable capacity from 28 to 32 liters, adapting to changing needs without losing compactness. Oxford Cordura® construction provides high resistance to tears and abrasion, while a reinforced base adds stability on rocky ground. Roll-top entry and a zipped back panel make loading fast and intuitive; a dedicated front avalanche compartment plus multiple carry systems for skis and tools make it a dependable alpine pack.

Best for: Ski tourers who want a functional, robust pack for the rougher, more technical days.

Retail price: 160,00 €

Majesty Superscout

A touring ski for those who spend real time in the mountains and want efficiency on the climb without losing confidence on the descent. Superscout blends lightness, control, and natural skiability across long ascents, technical traverses, and variable-snow descents. A paulownia core reinforced with poplar balances flex and reactivity, while the All-Mountain Rocker profile improves kick turns and stability when slope angles rise. With a narrow-ish waist and intuitive geometry, it follows your line rather than forcing one—ideal for long days and steady pace.

Best for: Ski tourers looking for a light, intuitive, reliable touring ski for the whole season.

Retail price: 699,00 €

Mountain Equipment Kedar Jacket & Pant

A GORE-TEX hardshell set built for all-mountain use in demanding winter conditions. Jacket and pants deliver reliable waterproof protection, effective breathability, and freedom of movement through long days outside. Designed for ski mountaineering and modern skiing in all its forms, it includes smart venting, room for layering, and secure pockets placed for use with a harness or pack. A versatile, robust shell system for skin tracks, steep lines, alpine terrain, lifts, and storm days—keeping comfort and performance consistent.

Best for: “Alpinists on skis” who need a set that allows climbing and skiing smoothly in the same day.

Retail price: 499,90 € jacket / 499,90 € pants

Ortovox Ortler Jacket

 **Prowinter**
Award

A revised hardshell for the most demanding ski-touring days, built around reliable protection and maximum essentialism. Ortler uses GORE-TEX Performance with a PFAS-free ePE membrane, delivering waterproofness and wind protection without sacrificing breathability and comfort during intense climbs. Its light, compact design packs easily into any backpack, while an ergonomic fit and functional details ensure freedom of movement and seamless performance. A technical piece made for ambitious ski mountaineering.

Best for: Ski mountaineers who want a protective, functional hardshell with a sober yet refined design.

Retail price: 570,00 €

Scarpa F1 RS

 **Prowinter**
Award

A ski mountaineering boot designed to combine lightness, precision, and smooth mobility for ambitious outings. F1 RS uses the Overlap Flow construction to deliver efficient energy transfer on the descent while keeping an easy, natural stride on the climb. The BOA® Remote Dial closure enables fast, precise adjustment on the move, while the H+R configuration provides support and control on technical terrain. A new chapter for a model that has become a modern ski mountaineering classic.

Best for: Experienced ski mountaineers who want a light yet supportive boot—the latest evolution of a true classic.

Retail price: 729,95 €

Trail Running

Keen Seek

A trail shoe designed to balance durability and lightness for long runs on variable terrain. The fit delivers immediate comfort and functional space, while dynamic cushioning supports the stride with protection and responsiveness. Built to resist wear without added bulk, it features an outsole that provides secure traction and consistent footing on demanding trails. A shoe designed to rack up the miles with confidence. Independent lab testing has certified durability up to 1,400 km.

Best for: Trail runners who want a comfortable shoe with a natural running feel.

Retail price: 180,00 €

La Sportiva Prodigio 2 Gtx

Ultralight trail running shoes designed to deliver secure footing and high performance in tough conditions. Prodigio 2 GTX shines on muddy trails, technical terrain, and slippery surfaces, maintaining comfort and control even in rainy endurance races. Waterproof protection supports continuous running in bad weather, while a breathable build keeps the foot supported on steep, intense climbs. Responsive cushioning provides strong energy return, and the outsole ensures traction and stability through technical sections. A shoe designed to push hard, regardless of the conditions.

Best for: Trail runners tackling technical terrain and long races who want protection, grip, and reactivity—even in the rain.

Retail price: 180,00 €

Lowa Amplux 2 Gtx

A versatile, high-performing trail running shoe, Amplux 2 GTX expands the ATR by Lowa collection through a project developed with the Lowa Trail Racers team. Designed for a smooth, controlled ride across different terrain, it balances cushioning with a dynamic, progressive response. Waterproof protection lets you take on rain and changing conditions without hesitation, making it suitable for both mountain training and faster valley trails. A shoe that combines comfort, propulsion, and reliability in a modern and functional design.

Best for: Trail runners who want a waterproof, responsive, versatile shoe for training and races on mixed routes—even in bad weather.

Retail price: 170,00 €

Merrel MTL SpeedArc Peak

A trail running shoe **with carbon plate** developed as the most advanced expression of Merrell's research. MTL SpeedARC Peak comes from years of field testing and direct athlete feedback, built to push speed, precision, and reliability without compromise. It's designed to run hard on technical terrain, keeping the foot stable, protected, and reactive at high intensity. Smooth, efficient cushioning supports the push, while traction stays consistent on variable surfaces. A shoe geared towards pure performance, designed for those seeking results, not shortcuts.

Best for: Experienced, competitive trail runners focused on maximizing speed, control, and performance on technical courses.

Retail price: 290,00 €

Mount to Coast M1

A road-to-trail shoe for runners who go long on mixed surfaces without having to choose between comfort, performance, and durability. H1 supports long distances with a balanced, smooth ride that transitions naturally from asphalt to dirt. Cushioning is responsive yet stable, designed to keep the stride supported as miles add up, while an adjustable fit follows the foot's changes during effort. The sole provides reliable traction on different terrains, making the H1 a solid companion for those who see distance as a space to explore, not a limit.

Best for: Runners alternating road, dirt, and gravel who want long-lasting comfort, stability, and practicality.

Retail price: 170,00 €

Norda 001 A

An ultra-distance shoe built for continuous comfort and reliable long-mile performance. 001A uses extremely lightweight, durable materials to reduce fatigue while maintaining efficiency kilometre after kilometre. Cushioning is balanced and resilient, supporting the stride without losing reactivity, while a wraparound structure provides stability and precision on demanding terrain. An outsole engineered for consistent traction and longevity completes the package, making the 001A a top choice for those who tackle long distances with an eye on performance and reliability.

Best for: Demanding ultrarunners who want top tech and aren't scared off by the price.

Retail price: 280,00 €

Rossignol Vercors

An endurance-focused trail running shoe designed to keep the stride efficient and consistent over long distances, engineered to accompany your stride with continuity and efficiency. Vercors represents the evolution of Rossignol's entry into trail running, combining prolonged comfort and reliable performance. A tuned geometry and lightweight upper support a fluid stride without fatiguing the foot, while cushioning remains soft yet reactive even after hours of running. The outsole delivers grip and durability on variable terrain, and an integrated protection plate reduces impact and fatigue kilometre after kilometre.

Best for: Endurance trail runners who want comfort, protection, and reliability over long distances.

Retail price: 160,00 €

Silva 1100 Free Run

A modular headlamp designed for running and high-intensity activities, where lightness and stability are key. Free Runner 1100 delivers powerful, well-distributed illumination while keeping head weight minimal thanks to a separate flat battery that can be carried in a pocket or running vest. The beam combines long-range and close-in light for smooth trail reading, while thermal management optimizes output as pace increases. The essential and adjustable design ensures prolonged comfort and freedom of movement, adapting to different configurations and uses.

Best for: Runners and outdoor athletes who want a powerful, lightweight, stable headlamp for demanding training and racing.

Retail price: 129,99 €

Trekking / Hiking

Ferrino Upsala

An insulated jacket designed to deliver warmth and protection in cold-weather outdoor use. Upsala pairs PrimaLoft® Silver Rise insulation with a high-density tubular fabric that's compact and durable. The seamless integrated construction boosts thermal efficiency and makes the jacket naturally wind-resistant, while staying light and comfortable. Its clean, functional design works equally well for trekking, travel, and everyday wear—city to mountain and back—with a comfortable fit even over long days.

Best for: Those seeking a warm, lightweight, versatile jacket to wear in the mountains as well as in the city.

Retail price: 219,90 €

Ferrino Lys Rapid Fit

Snowshoes designed for grip and stability on steep slopes and sidehills. The angled side profile holds on firm snow, while the geometry increases flotation in fresh snow. Serrated front ribs anchor each step for better control, and an integrated rear handle makes transport practical during approaches and transitions. The rear shape incorporates a practical carrying handle, making the tool functional even during approach and movement phases.

Best for: Winter hikers who want stable, easy-to-use snowshoes for variable terrain.

Retail price: 199,90 €

Garmont Etere Max

A shoe that blends hiking protection with trail-shoe pace. Built for confident movement on technical ground, it keeps the stride fluid when terrain gets complex. Balanced, stable cushioning supports motion without feeling heavy, and the outsole provides precise footing on rock, dirt, and mixed surfaces. A shoe that conveys control and confidence, inviting you to move with agility even on the most technical trails.

Best for: Anyone who wants to move fast but safely on more demanding terrain.

Retail price: 180,00 €

Hydro Flask Micro 400

A compact insulated bottle built for everyday carry and light outdoor use. Solid stainless-steel construction and effective insulation keep drinks hot or cold for hours, while the reduced size fits easily in packs and bags. A leakproof cap and durable outer finish round out a practical, long-lasting alternative to single-use containers. Perfect for short trips, travel, and light outdoor activities.

Best for: Anyone who wants an essential, compact bottle for daily life and light outdoor use.

Retail price: ND

La Sportiva Prodigio Hike LT Gtx

A hiking shoe with a runner's DNA—super light and built for sustained pace on variable terrain. A breathable, structured upper supports the foot when things get demanding; waterproof protection keeps you moving through sudden weather shifts. Cushioning supports long distances, and the outsole delivers grip on technical surfaces and steeper slopes. The sole guarantees grip and reliability on technical surfaces and steep slopes. Compared to the 2025 model, the gaiter has been eliminated to make it easier to slip your foot in.

Best for: Hikers who love vert, long distances, and a fast-and-light approach.

Retail price: 200,00 €

Leki Skysolo FX Carbon

A carbon telescopic pole developed with high-level mountaineers for high altitude and expedition use. An ultralight Verticon foam grip with extended section supports multiple hand positions, while the D-Loop Mesh strap—borrowed from trail running—stays breathable and quick-drying. Adjustable from 120 to 140 cm, it remains adaptable through every phase of ascent and descent. Skysolo FX Carbon is the result of collaboration with top-level mountaineers and combines extreme lightness and stability on technical terrain.

Best for: Experienced hikers and mountaineers who want an ultralight, precise pole for high mountains and expeditions.

Retail price: 220,00 €

Lowa Kano

A winter shoe designed for comfortable, confident movement in non-technical outdoor settings. Kano combines weather protection and steady warmth thanks to a GORE-TEX membrane with integrated insulation and a warm inner lining. A higher upper with a soft collar wraps the foot for immediate comfort, while durable materials stand up to snow and wet surfaces. Smooth cushioning supports all-day walking, and the outsole delivers reliable traction on winter terrain. Minimalist style that also looks good in urban use.

Best for: Anyone who wants warm feet for long walks in the snow and prefers a non-extreme shoe with a sober design.

Retail price: 180,00 €

Meindl Winter Hiker

A boot designed for real winter outdoor use, where protection, comfort, and practicality must work together. A robust leather upper pairs with a GORE-TEX Insulated Comfort lining for waterproofness and effective insulation. Duo Lacing enables fast, precise adjustment, and the Multigrip G7 Active outsole delivers dependable traction on snow and mixed winter ground. A felt-layer insole adds insulation from the cold ground. The insulating felt insole helps keep your feet warm during longer outings, offering immediate and lasting comfort.

Best for: Winter hikers and active outdoor users who want a warm, stable, easy-to-use boot.

Retail price: ND

Martini Sportswear Yalca Roam 2,5L

A 2.5-layer shell designed to protect without bulk. Fully taped seams and 20,000 mm waterproof rating keep it reliable in prolonged rain. Stretch fabric supports movement and a DWR finish helps water and dirt shed quickly. A two-way front zip, two zippered pockets, elastic edges, and an adjustable hood complete a minimalist, functional jacket. Perfect for those seeking quality in an understated style.

Best for: Hikers who walk in any weather and want a practical, low-bulk shell they can always carry.

Retail price: 399,00 €

Ortovox Downwool 180 Hooded Jkt

A lightweight insulating jacket built for year-round mountain use. Downwool 180 can be worn as an outer layer or under a shell, providing steady warmth even during high-output phases. DownWool® insulation blends RDS-certified down with wool for improved moisture management and consistent thermal efficiency without overheating. A windproof, water-repellent recycled polyamide outer completes the package. Suitable for variable conditions and prolonged use in alpine environments.

Best for: Anyone who wants a light insulating jacket adaptable to alpine activities in colder seasons.

Retail price: 380,00 €

Mammut Sender IN Vest

A versatile insulated vest featuring synthetic LoopInsulation made from the recovery and recycling of climbing ropes produced by Mammut itself. The brick-lay engineered 3D baffles reduce cold spots thanks to their offset construction and the absence of seams. Equipped with a recycled, wind-repellent outer fabric, the Sender IN Vest offers effective protection for all activities on the move and represents a step forward towards a more circular production process.

Best for: For those looking for a vest that delivers warmth where it's needed, with the distinctive appeal of "wearing" what were once climbing ropes.

Retail price: ND

Rock Experience Tracker

A technical midlayer blending minimalist aesthetics with high performance. Double Wave technology traps warm air in a light, reactive structure, while the outer fabric blocks wind without preventing heat release—ideal for sustained pace and high-aerobic-intensity activities. A garment that stands out more for its functionality than for its design, which is deliberately understated and essential.

Best for: Anyone seeking a lightweight, high-performing multisport layer at an accessible price.

Retail price: 135,00 €
